OBJECTTIVES

Special interest in Web Development with React, Redux, backed by Express or Django. Get used to work with MySQL and NoSQL to manipulate database.

EDUCATION

Georgia Institute of Technology - Atlanta, Georgia   Graduation: 2021

B.S COMPUTER SCIENCE (Info Internetwork/Modeling)

Relevant Coursework: Computer Networking, Operating System, Database System, Object & Design Pattern, Intro to Artificial Intelligence, Discrete Math, Algorithm

SKILLS

- **Languages:** JavaScript, Python, MySQL, NoSQL, HTML5, CSS
- **Framework/Platform:** React.js, Django, Express, REST, Git, Unix/Linux, Node.js, MongoDB

EXPERIENCE

Software Engineer Intern – Pegasystems Company   May – Aug 2019

- Developed UI features and design routes that allow user to create/edit items in React-Redux framework
- Contributed Unit and API Test to Continuous Development toolchain
- Tools: React.js, React-Redux, JavaScript, HTML, CSS, Agile, Git, SQL Server

Teaching Assistant – STEM courses at Georgia State University   Jan 2018 – May 2018

- Helped over 50 students to understand principles in Data Structure and Calculus Courses

PROJECTS

TweetMe – Django React Web App   August 2020-current

A Web App Project allows user to post/edit their tweets. This project get inspired from the idea of Twitter app

- Used Serialize Django Model Object to work with Tweet, User objects
- Handled view and pagination with React. Wrote Tests in Django

  Link: https://github.com/Ducle141/TweetMe_Django_React

JPMorgan Chase Software Engineer Virtual Experience   July 2020

A web App Project displays stock price data and displays data visualization

- Used Perspective to display data visually for traders by creating charts

Dev Net MERN Stack – React-Redux Web App   Oct 2018

A Web App Project helps Developer Students to put their profile on and connect with others in Tech industry

- Implemented authentication feature and routing configuration using JWT and sessions

  Link: https://github.com/Ducle141/Devnet-mern-stack/commits/master

Etherity – Blockchain Auction Web App   Oct 2018

A Charity Bindding Web App Project uses Ethereum to handle online transaction

- Used Smart Contract automates activities and enhances data security and integrity
- Built smart Contract, Web API and front-end components interacting with web3 services

  Link: https://github.com/Ducle141/etherity

LEADERSHIPS AND AWARDS

Finance Director – Student Government Association at GSU   2018

Reward – STEM Student Academic Award & Dean's List   2018
